## EDUCATION

**B.A.Sc. in Software Engineering** | CGPA 9.89/10.0, Dean's List

September 2019 – Present

University of Ottawa

Ottawa, ON

- Relevant courses: Software Design and Architecture, User Interfaces, Databases, Computer Networking

## EXPERIENCE

**Software Engineer (Co-op)**

January 2021 – April 2021 & September 2021 – Present

Manulife Financial Corporation

Toronto, ON

- Developed REST APIs and implemented backend services to perform financial calculations using Java Spring Boot and to decommission the Quant database which reduced business costs
- Taught myself React.js to develop frontend features such as tables generated from Excel spreadsheets while interacting with a REST API in the backend which improved UX for quant analysts and portfolio managers
- Built a feature to fetch and validate security cashflows from multiple SQL databases using Spring JPA and JDBC
- Wrote unit tests using Groovy and mocked REST APIs using Postman and Microsoft SQL Server
- Monitored logs for existing Java microservices in Pivotal Cloud Foundry platform and addressed production bugs
- Wrote Flyway and PowerShell scripts and set up ConcourseCI pipelines to support migrations from GitLab to GitHub and SQL Server to Azure SQL which improved the development environment for engineers

**Python Teaching Assistant**

September 2021 – Present

University of Ottawa, Faculty of Engineering

Ottawa, ON

- Presented and hosted weekly laboratory sessions for first year Python students
- Hosted weekly office hours to explain computing concepts in Python for first year students
- Developed assessment solutions and provided feedback for assignments, labs, and exams

**Software Developer (Co-op)**

May 2020 – August 2020

Employment and Social Development Canada

Gatineau, QC

- Taught myself Spring Boot and Apache frameworks (Camel, Maven, Kafka) to build and maintain REST APIs supporting government Web services including early COVID-19 operations in an Agile Scrum environment
- Initiated skeleton of backend API used in Web services supporting Canada Pension Plan and Old Age Security
- Tested REST/SOAP APIs using Postman and SoapUI before the release of Government services during COVID-19

## SKILLS

**Languages:** Java, JavaScript, Python, C, C++, SQL, HTML, CSS, Bash

**Frameworks and Libraries:** Spring Boot, React.js (AntDesign, MaterialUI), Node.js, Express.js, jQuery, Bootstrap

**Tools:** Microsoft SQL Server, Git, Apache (Maven, Camel, Kafka), ConcourseCI, MongoDB, JIRA

## PROJECTS

[www.moebachrouch.com](http://www.moebachrouch.com) | HTML, CSS, JavaScript, Bootstrap, jQuery, Formspree, AOS library

- Designed, developed, and deployed an HTTPS personal portfolio website with a custom domain
- Implemented a contact form using Formspree and validated the form using JavaScript/jQuery and RegEx
- Embellished the website by adding animations using the animation on-scroll (AOS) library

[RLC Circuit Design](#) | C, PLplot library

- Built a C application from the ground-up using the PLplot library
- The program plots a function derived from Kirchhoff's second law based on user input by using an incremental search root-finding method with a total of 100 points

[Menace](#) | Java

- Developed a machine-learning tic-tac-toe algorithm for a course project based on a 1961 paper by Donald Michie
- The AI learns how to play automatically against a human via reinforcement learning

## ACHIEVEMENTS

- Ranked in top 3% among 200 students in a Python course at uOttawa after learning Python for the first time
- Received multiple engineering scholarships for stellar academic performance and community engagement
- Built a personal custom PC with the help of Google, Reddit, pcpartpicker, and user manuals for the parts
